

MEMO TO: Environmental Coordinator
Air Contaminant Sources

FROM : Jeffrey L. Burgess, P.E.
Director
Air Quality Division

RE : Title V Permit to Operate

DATE : April 10, 2001

Attached to this memorandum is a set of a Title V permit application with instructions to be completed for a Title V Permit to Operate in accordance with Section 33-15-14-06 of the North Dakota Air Pollution Control Rules. Please fill out any sections that are applicable to emission sources at your facility. All emission points must be identified and emission rates calculated. Detailed information is not required for source units that have the "potential to emit" of emissions less than the quantities listed below; however, enough information must be provided to determine the applicable requirements. These source units are considered insignificant or exempt units and are addressed in Section F - Exempted Units in the permit application.

PM ₁₀ *	:	2 tpy (tons per year)
SO ₂	:	2 tpy
H ₂ S	:	2 tpy
CO	:	2 tpy
NO _x	:	2 tpy
Ozone	:	2 tpy
VOCs	:	2 tpy
Reduced Sulfur Compounds	:	2 tpy
All other regulated	:	0.5 tpy
Contaminants** including the Section 112(b) contaminants		

* For purposes of Title V applicability, only PM₁₀ emissions need to be counted. Total suspended particulate matter emissions need not be included when determining Title V applicability.

** A list of regulated contaminants is attached to this permit application.

For the determination of emissions from a source unit, emissions of regulated pollutants less than 0.2 ton/yr (400 lb/yr) of criteria pollutants and 0.05 ton/yr (100 lb/yr) of air toxic pollutants need not be addressed in the permit application. For emissions of unregulated pollutants, only emissions descriptions (not estimates) need to be provided.

Also, included with this memorandum are the following:

1. Criteria required for a determination of a complete application in accordance with Section 33-15-14-06, Title V Permit to Operate Program.
2. Listing of trivial activities which may be omitted from the Title V application.
3. Compliance Assurance Monitoring (CAM) guidance.

In addition, the following EPA White Papers can be obtained by contacting the Department:

- EPA's "White Paper for Streamlined Development of Part 70 Operating Permits Program."
- EPA's "White Paper Number 2 for Improved Implementation of the Part 70 Operating Permits Program."
- EPA's "Design of Flexible Air Permits, Operating Permits Program, White Paper Number 3."

The above-mentioned EPA White Papers can also be obtained from the following website:

<http://www.epa.gov/ttncaa/t5wp.html>

For information where there is not a specific application, the information should be supplied on a separate sheet of paper.

The Title V application must be signed and returned to the Department at the following address:

North Dakota Department of Health
Division of Air Quality
1200 Missouri Avenue, Room 304
Box 5520
Bismarck, ND 58506-5520

In addition, a copy of the complete initial or renewal Title V application must be sent to:

Unit Leader, Air Technical Assistant Unit (8P-AR)
U.S. EPA - Region VIII
One Denver Place
999 18th Street, Suite 300
Denver, CO 80202-2466

Only a Title V Permit application needs to be submitted to the EPA. A "synthetic minor" permit application only needs to be submitted to the Department.

If you need assistance in filling out the application, contact the Department at (701)328-5188.
